

1. MSM, Blueprint, Live Copy, and Rollout

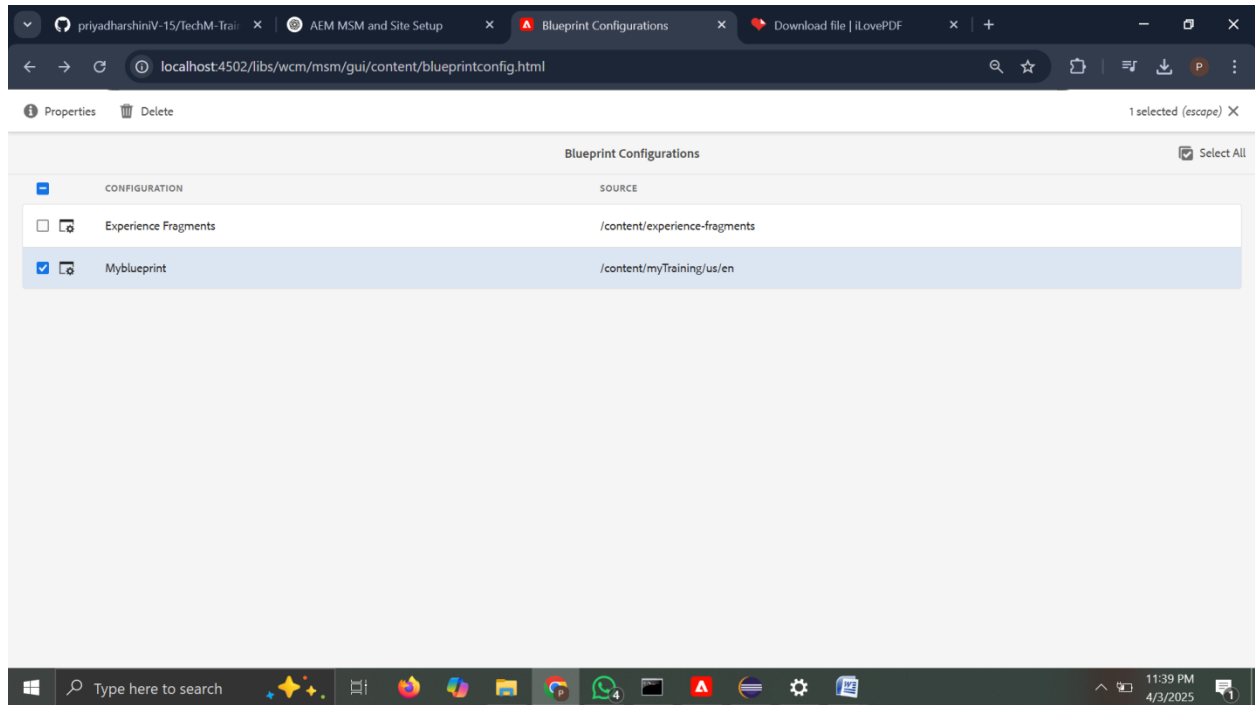

- **MSM (Multi-Site Manager):** AEM's feature that allows managing multiple related websites from a single source.
- **Blueprint:** A master content structure that serves as the source for Live Copies.
- **Live Copy:** A site or page created from a Blueprint that maintains a relationship with the source.
- **Rollout:** The process of pushing changes from the Blueprint to Live Copies.

2. What is a Language Copy?

- A **Language Copy** in AEM is a localized version of a website that is created to support multiple languages. Unlike MSM Live Copies, Language Copies do not maintain a relationship with the source once created.

3 Create a site using MSM and us en should be source

4 Create this page <https://www.mcdonalds.com/us/en-us/about-our-food.html> and author the page using components use the content/images from above page.

We're Passionate About Our Food

Explore McDonald's food facts, including calorie and dietary info. Learn about nutrition facts and the ingredients used to deliver quality in every meal, including more balanced options for a Happy Meal® and each fresh beef Quarter Pounder®* burger is cooked when you order.

*Weight before cooking 4 oz. At participating McDonald's. Fresh Beef available at most restaurants in contiguous US. Not available in Alaska, Hawaii, and US Territories.
